INTERNATIONAL JOURNAL OF SYSTEMS SCIENCE

Volume 39 January 2008

CONTENTS

Ecological optimization of pollution control equipment and planning from a simulation perspective
William Conley 1

Robust Kalman filter of continuous-time Markov jump linear systems based on state estimation performance
Xiaobo Xiao, Hongsheng Xi, Jin Zhu and Haibo Ji 9

Refining and verifying regular Petri nets
Li Jiao 17

Output tracking for nonlinear non-minimum phase systems and application to PVTOL aircraft
Xinhua Wang, Geng Yang and Wenli Xu 29

Adaptive fault-tolerant control for a class of nonlinear systems with time delay
D. Ye and G. H. Yang 43

A new model-free adaptive sliding controller for active suspension system
Hung-Yi Chen and Shiuh-Jer Huang 57

Optimal replacement period of a two-unit system with failure rate interaction and external shocks
Min-Tsai Lai and Ying-Chang Chen 71

Positive solutions of a discrete-time descriptor system
Begoña Cantó, Carmen Coll and Elena Sánchez 81

Discrete time output feedback sliding mode control for nonlinear MIMO system: a stepper motor case
B. Bandyopadhyay and V. K. Thakar 89

Volume 39 February 2008

CONTENTS

Neural network-based modelling of subsonic cavity flows
Mehmet Önder Efe, Marco Debiasi, Peng Yan, Hitay Özbay and Mohammad Samimy 105

A fast linear-in-the-parameters classifier construction algorithm using orthogonal forward selection to minimize leave-one-out misclassification rate
X. Hong, S. Chen and C.J. Harris 119

Realization theory for two-time-scale distributions through approximation of Markov parameters
H. Oloomi and B. Shafai 127

State observer design and stabilization control for a class of nonlinear systems
Xin-Zhuang Dong 139

Visual motion and structure estimation using sliding mode observers
Mustafa Unel, Asif Sabanovic, Burak Yilmaz and Eray Dogan 149

Adaptive fuzzy control systems with dynamic structure
Chaio-Shiung Chen 163

DNA computing approach for automated test pattern generation for digital circuits
Amardeep Singh and Maninder Kaur 173

Uniform stability of discrete impulsive systems
Bin Liu and Xinzhi Liu 181

Discrete-event modelling of fire spreading
Alexandre Muzy, Eric Innocenti, Antoine Aiello, Jean-François Santucci, Thierry Marcelli and Paul Antoine Santoni 193

Polynomial fixed-point smoothing of uncertainly observed signals based on covariances
S. Nakamori, R. Caballero-Águila, A. Hermoso-Carazo, J. Jiménez-López and J. Linares-Pérez 207

Volume 39 March 2008

CONTENTS

A mixed-integer programming model for global logistics transportation problems
Y. Wu 217

Analysis of time-varying singular bilinear systems by hybrid functions
H.R. Marzban, M. Razzaghi and M. Shafiee 229

Online optimization of replacement policies using learning automata
E. Ikonen and K. Najim 237

On the prediction of genes based on the asymptotic local approach
W.K. Yeung and C.W. Chan 251

Stability and robustness analysis of MIMO MRAC using $K_p = L_2 D_2 S_2$ factorization
Xue-Jun Xie 265

Warranty cost analysis for nonrepairable services products
Shaomin Wu and Min Xie 279

A new pseudo-Gaussian-based recurrent fuzzy CMAC model for dynamic systems processing
D.-Y. Wang, C.-J. Lin and C.-Y. Lee 289

Delay-dependent robust stabilisation of uncertain discrete-time switched systems with time-varying state delay
Dongsheng Du, Bin Jiang and Shaosheng Zhou 305

Identification and analysis of spatio-temporal dynamical systems using wavelets
L.Z. Guo and S.A. Billings 315

Volume 39 April 2008

CONTENTS

Optimisation of the weighting functions of an H_∞ controller using genetic algorithms and structured genetic algorithms
E. Alfaro-Cid, E.W. McGookin and D.J. Murray-Smith 335

Robust sliding mode observer-based actuator fault detection and isolation for a class of nonlinear systems
X.-G. Yan and C. Edwards 349

Iterative learning control for a class of nonlinear discrete-time systems with multiple input delays
X.-D. Li, T.W.S. Chow and J.K.L. Ho 361

A sequential LQG approach to nonlinear tracking problem
Ž.M. Djurović and B.D. Kovačević 371

State feedback control of networked systems with uncertain plant
S. Mu, T. Chu and L. Wang 383

Closed-loop subspace-based identification algorithm using third-order cumulants
K. Li and H. Zhang 395

Learning the demand function in a repeated Cournot oligopoly game
G.-I. Bischi, L. Sbragia and F. Szidarovszky 403

Improved periodic review inventory model involving lead-time with crashing components and service level
S.-K. Liang, P. Chu and K.-L. Yang 421

Delay-dependent H_∞ control of linear discrete-time systems with an interval-like time-varying delay
Y. He, M. Wu, Q.-L. Han and J.-H. She 427

Parameter estimation from noisy measurements
I. Vajk 437

Volume 39 May 2008

CONTENTS

Two-unit repairable systems with common-cause shock failures and fuzzy parameters: parametric programming approach
H.-I. Huang, C.-H. Lin and J.-C. Ke 449

Optimal digital controller and observer design for multiple time-delay transfer function matrices with multiple input–output time delays
H.-P. Wang, L.-S. Shieh, J.S.H. Tsai and Y. Zhang 461

Absolute stability analysis for a class of Takagi–Sugeno fuzzy control systems
C.-C. Fuh 477

Reformulation of LMI-based stabilisation conditions for non-linear systems in Takagi–Sugeno's form
B. Ding and B. Huang 487

An intelligent robust tracking control for electrically-driven robot systems
Y.-C. Chang, H.-M. Yen and M.-F. Wu 497

Iterative learning controllers with time-varying gains for large-scale industrial processes to track trajectories with different magnitudes
X. Ruan and Z. Bien 513

A mathematical method for control problems on cellular automata models
S. El Yacoubi 529

Optimal inventory replenishment policy for the EPQ model under trade credit derived without derivatives
Y.-F. Huang and H.-F. Huang 539

Optimal filtering for linear systems with state and multiple observation delays
M. Basin, M.A. Alcorta-Garcia and A. Alanis-Duran 547

Weighted bootstrap for neural model selection
S.-C. Chuang, W.-L. Hung and H.-C. Fu 557

Volume 39 June 2008

CONTENTS

Fuzzy modeling of system behavior for risk and reliability analysis
R.K. Sharma, D. Kumar and P. Kumar 563

Hybrid learning-based neuro-fuzzy inference system: a new approach for system modeling
K.-H. Cheng 583

Optimal cooperation between external criterion and data division in GMDH
C.-Z. He, J. Wu and J.-A. Müller 601

A taxonomy for wavelet neural networks applied to nonlinear modelling
E. Ribes-Gómez, S. McLoone and G. Irwin 607

The joint replenishment problem involving multiple suppliers offering quantity discounts
I.K. Moon, S.K. Goyal and B.C. Cha 629

A novel path planning and control framework for passive resistance therapy with a robot manipulator
A. Behal, J. Chen and D.M. Dawson 639

Availability optimisation of repairable system with preventive maintenance policy
H. Xu and W. Hu 655

Volume 39 July 2008

SPECIAL ISSUE: PRODUCTION COORDINATION AND INVENTORY POLICIES
GUEST EDITORS: YANNICK FREIN AND JEAN-CLAUDE HENNET

CONTENTS

Guest Editorial 665

Decision support for supply chain planning under uncertainty
F. Galasso, Colette Mercé and Bernard Grabot 667

On the link between inventory and responsiveness in multi-product supply chains
Andreas Reichhart, José M. Framiñán and Matthias Holweg 677

Kanban policy improvement thanks to a (max,+)-algebra analysis
B. Cottenceau, L. Hardouin and I. Ouerghi 689

Supply-chain modelling and control under proportional inventory-replenishment policies
C.I. Papanagnou and G.D. Halikias 699

Extended beta-binomial model for demand forecasting of multiple slow-moving inventory items
Alexandre Dolgui and Maksim Pashkevich 713

Execution errors in retail supply chains: analysis of the case of misplaced products
Yacine Rekik, Evren Sahin, Zied Jemai and Yves Dallery 727

Inventory control in a decentralised two-stage make-to-stock queueing system
Yasemin Arda and Jean-Claude Hennet 741

Volume 39 August 2008

CONTENTS

Sliding mode observers: a survey
S.K. Spurgeon 751

Approximate controllability of the n-th order infinite dimensional systems with controls delayed by the control devices
J.S. Respondek 765

Confidence estimation of GMDH neural networks and its application in fault detection systems
J. Korbicz and M. Mrugalski 783

An inventory model for ameliorating and deteriorating items taking account of time value of money and finite planning horizon
H.-M. Wee, S.-T. Lo, J. Yu and H.C. Chen 801

Analysis and synthesis of discrete nonlinear passive systems via affine T–S fuzzy models
W.-J. Chang, C. Chieh Ku and W. Chang 809

An integrated production-inventory deteriorating model for pricing policy considering imperfect production, inspection planning and warranty-period- and stock-level-dependant demand
C.J. Chung and H.-M. Wee 823

On stability of linear time-delay systems with multiple delays
G.-S. Park, H.-L. Choi and J.-T. Lim 839

Online customer identification based on Bayesian model of interpurchase times and recency
S.-C. Lo 853

Volume 39 September 2008

SPECIAL ISSUE: THE SEVENTH PORTUGUESE CONFERENCE ON AUTOMATIC CONTROL (CONTROLO'2006)

GUEST EDITOR: MIGUEL AYALA BOTTO

CONTENTS

Editorial: Special issue on the Seventh Portuguese Conference on Automatic Control (CONTROLO'2006)
Miguel Ayala Botto 865

Extension of local linear controllers to global piecewise affine controllers for uncertain non-linear systems
Behzad Samadi and Luis Rodrigues 867

Rolling Stiefel manifolds
K. Hüper, M. Kleinsteuber and F. Silva Leite 881

Regularity of solutions to higher-order integrals of the calculus of variations
Moulay Rchid Sidi Ammi and Delfim F.M. Torres 889

Subspace identification of linear parameter-varying systems with innovation-type noise models driven by general inputs and a measurable white noise time-varying parameter vector
P. Lopes dos Santos, J.A. Ramos and J.L. Martins de Carvalho 897

Optimisation-based approach for a better centrifugal spreading
T. Virin, J. Koko, E. Piron, P. Martinet and M. Berducat 913

Volume 39 October 2008

CONTENTS

Model selection approaches for non-linear system identification: a review
X. Hong, R.J. Mitchell, S. Chen, C.J. Harris, K. Li and G.W. Irwin 925

A lattice model of fashion propagation with correlation analysis
T. Kawai, Y. Tadokoro, K.-I. Tainaka, T. Hayashi and J. Yoshimura 947

The prediction of asphalt pavement permanent deformation by T-GM(1,2) dynamic model
G.-D. Li, D. Yamaguchi, M. Nagai and S. Masuda 959

How non-zero initial conditions affect the minimality of linear discrete-time systems
L.G. Van Willigenburg and W.L. De Koning 969

Reduced-order filtering design for non-linear systems with H^{∞} setting
Y.-F. Li, C.-F. Yung and C.-S. Tseng 985

Number-dependent replacement model with random lead-time for systems under maintenance continuously
Y.-H. Chien 995

Anomaly detection in complex system based on epsilon machine
K. Xiang, X. Zhou and J.P. Jiang 1007

Fault detection and diagnosis of networked control system
Y. Zhang, Y. Chen, J. Sheng and T. Hesketh 1017

Non-descriptor dynamic output feedback ESPR controller design for continuous-time descriptor systems
J.L. Chen 1025

New delay-dependent conditions on robust stability and stabilisation for discrete-time systems with time-delay
J. Yoneyama and T. Tsuchiya 1033

Volume 39 November 2008

SPECIAL ISSUE: NETWORKED CONTROL SYSTEMS AND WIRELESS SENSOR NETWORKS - THEORIES AND APPLICATIONS

GUEST EDITORS: SHUANG-HUA YANG AND YI CAO

CONTENTS

Guest Editorial: Networked control systems and wireless sensor networks: theories and applications
S.-H. Yang and Y. Cao 1041

Networked fault detection with random communication delays and packet losses
Xiao He, Zidong Wang and Donghua Zhou 1045

Networked predictive control of systems with random delay in signal transmission channels
G.P. Liu, S.C. Chai, J.X. Mu and D. Rees 1055

Design of a networked control system with random transmission delay and uncertain process parameters
Ye Yang, Yongji Wang and Shuang-Hua Yang 1065

Networked non-linear control for an aluminum plate thermal process with time-delays
Mingcong Deng and Akira Inoue 1075

Hilbert mobile beacon for localisation and coverage in sensor networks
Jacques M. Bahi, Abdallah Makhoul and Ahmed Mostefaoui 1081

Volume 39 December 2008

CONTENTS

A survey of linear matrix inequality techniques in stability analysis of delay systems
Shengyuan Xu and James Lam 1095

Implementation of supervisory control using extended finite-state machines
Y. Yang, A. Mannani and P. Gohari 1115

A new optimal approach for multiple optimisation objectives grid resource allocation and scheduling
Li Chunlin and Li Layuan 1127

Delay-dependent robust $\mathcal{H}_\infty$ control for uncertain stochastic time-delay system
Yuanqing Xia, Jiqing Qiu, Jinhui Zhang, Zhifeng Gao and Jianfei Wang 1139

Performance and robustness preservation in MIMO systems when applying SPR Substitutions
G. Fernández-Anaya, J.C. Martínez-García, V. Kučera and D. Aguilar-George 1153

Swing-up control strategies for a reaction wheel pendulum
K.N. Srinivas and Laxmidhar Behera 1165

A comment on the 'Robust mixed time-optimal control for third-order systems with model uncertainty'
Andrzej Bartoszewicz 1179

A Bayesian network model for surface roughness prediction in the machining process
M. Correa, C. Bielza, M. de J. Ramirez and J.R. Alique 1181

Evaluating flexibility on order quantity and delivery lead time for a supply chain system
Yi-Chi Wang 1193

Stabilisation designs for the inertia wheel pendulum using saturation techniques
Huawen Ye, G.P. Liu, Chunhua Yang and Weihua Gui 1203
